

Dry Gas Couplings

The Dry Gas Coupling has been developed for a safe and quick connection and disconnection of hoses and loading arms to tank trucks, rail tankers and tank containers. During connection and after disconnection there is no spillage.

This increases safety in the loading process of hazardous fluids.

Suitable for handling a range of LPG applications - Propane and Butane but also for other applications with similar requirements the Dry Gas Coupling is useful.

The robust design, easy servicing and high level of security assures safe and frequent use on a long term basis. This protects the environment and the media handled, reduces the risk of accidents and saves money.

A modular design with several optional features makes it possible to find individual solutions for your special application.

APPLICATION

Heavy vehicle filling
Loading / unloading of bobtails
Loading / unloading of tank trucks
Loading / unloading of rail cars
Loading / unloading ship to shore
